Wholesale Eligibility & Terms

- Wholesale pricing applies only to orders meeting or exceeding the MOQ of 50 units per order.
- Orders below MOQ will be charged at MSRP.
- Wholesale pricing is intended for resale, professional use, or bundled product offerings.
- Ascenda reserves the right to approve or decline wholesale accounts at its discretion.

Due to the value-added wound-healing and antimicrobial features and benefits of the NanoMatrix™ Diluent, wholesale pricing is offered exclusively under a License & Supply Agreement.

Under this agreement, the distributor shall be obligated to:

- Purchase a minimum order quantity (MOQ) of NanoMatrix™ Diluent at the established wholesale price.
- Remit a royalty of 7.5% calculated on the retail selling price of all peptide products reconstituted using NanoMatrix™ Diluent.

This licensing structure reflects NanoMatrix™ proprietary formulation, functional enhancement of peptide reconstitution, and differentiated clinical value, and ensures appropriate alignment between product utilization and intellectual property rights.

Pricing Integrity

- Partners are expected to respect MSRP guidelines to maintain brand value and market consistency.
- Unauthorized discounting, undercutting, or resale through non-approved channels may result in termination of wholesale privileges.

Pricing Updates

Ascenda Peptides reserves the right to revise pricing, MOQs, or wholesale terms with prior notice based on market conditions, cost structures, or strategic considerations.
